

## JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

All through their trip, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite market for a product that could promptly and securely lift people in the air to accomplish upkeep and other building services.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they designed and sold the first JLG aerial work platform. The company incorporates some of the basic design essentials of that original lift into current models.

JLG lift trucks have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into a range of markets worldwide and develops new products to make sure consumers are capable of being more effective and perform in the workplace within a safer atmosphere.
